## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03 December 2007 has been entered.

## **REASONS FOR ALLOWANCE**

2. Claims 1-37, 39, 40, 42-47, 49-54, 56, 58-68 and 70-72 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Claims 1 and 32 are allowable for at least the reason, "whereby at least one of the first reflective filter function and the second reflective filter function is not substantially flat over a substantial portion of the respective first and second reflective filter function" as set forth in the claimed combination. Claims 2-21, 33-37, 43-47, 49-54 and 56 are allowable due to their dependence on claims 1 and 32 .

Claim 22 is allowable for the reasons provided in the previous office actions. Claims 23-31, 39, 40, 42 and 70 are allowable due to their dependence on claim 22.

Claim 58 is allowable for at least the reason, "whereby the first reflection wavelength and the second reflection wavelength are substantially the same" as set

forth in the claimed combination. Claims 59-68 are allowable due to their dependence on claim 58.

Claim 71 is allowable for at least the reason, "whereby at least one of the first reflective filter function and the second reflective filter function is not substantially constant over a substantial portion of the respective first and second reflective filter function" as set forth in the claimed combination.

Claim 72 is allowable for at least the reason, "whereby at least one of the first reflective filter function and the second reflective filter function is not substantially rectangular or square in shape" as set forth in the claimed combination.

The prior art of record teaches an optical filter comprising a first optical element including a first reflective element for receiving light and reflecting a first wavelength band of the light centered at a first reflective wavelength, the first reflective element characterized by a first reflective filter function; and a second optical element, optically connected to the first a second optical element to receive the reflected first wavelength band of the light, including a second reflective element for reflecting a second wavelength band of the light centered at a second reflection wavelength, the second reflective element characterized by a second reflective filter function. However, the prior art of record does not teach that at least one of the first reflective filter function and the second reflective filter function is not substantially flat over a substantial portion of the respective first and second reflective filter function or that the first reflection wavelength and the second reflection wavelength are substantially the same or not substantially rectangular or square in shape and there is no motivation or teaching to

modify this difference as derived. In this regard, Applicant's arguments presented on page 15, 3<sup>rd</sup> paragraph and pages 20 and 21 of the latest response were found persuasive.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
